

The figure displays a 13x13 grid of 169 hexagonal plots, each containing a pattern of black dots on a white hexagonal grid. The patterns evolve from the top-left to the bottom-right. The first row shows a single dot at the top-left. Subsequent rows show the dot moving and growing into various shapes, including lines, clusters, and eventually filling a large portion of the hexagonal area. The final row shows a large, dense cluster of dots in the bottom-right corner.
