A hexagonal grid of 49 white hexagons arranged in a larger hexagonal shape. The grid is surrounded by a gray border. A single hexagon in the center is black.

A large hexagonal grid of white hexagons with gray borders. In the center of the grid, there is a 3x3 square of black hexagons. The black hexagons are arranged in a square pattern, with one black hexagon in the center and eight surrounding it.

A large hexagonal grid of white hexagons on a light gray background. In the center, there is a cluster of six black hexagons arranged in a small, irregular shape. The grid is composed of many hexagons, with the central cluster being the only non-white feature.

A large hexagonal grid of white hexagons is shown. In the center, there is a cluster of six black hexagons arranged in a small, irregular shape. The grid is composed of many hexagons, with the central cluster being the only non-white feature.

A diagram showing a hexagonal grid. In the center, there is a cluster of 6 black hexagons arranged in a honeycomb pattern. This central cluster is surrounded by a ring of 12 white hexagons, which are also arranged in a honeycomb pattern around the black cluster.

A large hexagonal grid of white hexagons with black outlines. In the center of the grid, there is a small cluster of five black hexagons. The grid is roughly circular in shape, with the black cluster located in the lower-middle part of the overall shape.

A large hexagonal grid of white hexagons on a light gray background. A small cluster of seven black hexagons is located in the lower right quadrant of the grid.

A large hexagonal grid of white hexagons on a light gray background. A small cluster of six black hexagons is located at the bottom center of the grid.
