

The image displays a 13x13 grid of 169 hexagonal cells. Each cell contains a unique pattern of black dots, representing various mathematical concepts. The patterns are arranged in a systematic manner, often following a sequence or a specific geometric arrangement. For example, the first row shows patterns that resemble the numbers 1 through 13. The second row shows patterns that resemble the numbers 14 through 26. The third row shows patterns that resemble the numbers 27 through 39. The fourth row shows patterns that resemble the numbers 40 through 52. The fifth row shows patterns that resemble the numbers 53 through 65. The sixth row shows patterns that resemble the numbers 66 through 78. The seventh row shows patterns that resemble the numbers 79 through 91. The eighth row shows patterns that resemble the numbers 92 through 104. The ninth row shows patterns that resemble the numbers 105 through 117. The tenth row shows patterns that resemble the numbers 118 through 130. The eleventh row shows patterns that resemble the numbers 131 through 143. The twelfth row shows patterns that resemble the numbers 144 through 156. The thirteenth row shows patterns that resemble the numbers 157 through 169.
