

The image displays a 10x10 grid of 100 hexagonal patterns. Each pattern is a hexagonal cluster of smaller hexagons, with some hexagons filled black and others white. The patterns are generated by a cellular automaton rule, showing various configurations of black and white hexagons. The patterns are arranged in a grid, with each pattern occupying a square cell. The patterns are generated by a cellular automaton rule, showing various configurations of black and white hexagons.
