

The image displays a 13x13 grid of 169 hexagonal plots. Each plot contains a black dot pattern on a white hexagonal grid. The pattern starts as a single dot in the top-left plot and spreads outwards in a hexagonal lattice, forming a larger hexagonal shape by the bottom-right plot. The dots are arranged in a way that suggests a growth or diffusion process, with the pattern becoming more complex and dense as it moves from the top-left to the bottom-right.
